

Manufacturing Campaign:

Imagine a manufacturing industry that supplies all the parts, skills, apprentices, research and technology for new tram and train builds, the value-adding for lithium battery production, the new electric vehicle production line or the wind tower and solar panel production. That's our dream. That's our goal.

The AMWU is working toward rebuilding manufacturing in this State and in Australia. We will campaign, pressure and debate toward a self-reliant, climate-friendly manufacturing base.

We will campaign in the streets for our jobs that exist now and we demand that the jobs of the future are secure and permanent. We insist new jobs are safe jobs and the training and apprentices are well looked after. The AMWU will be there for all those workers, ensuring they have the representation they deserve!

We will find and support governments and politicians who support manufacturing – not just in word but also in deed. We will work with companies that are interested in investing in the future. But this is a campaign for the community first and foremost! This is our future - a clean green manufacturing base.

Here's how you can help:

- **Petitions** - We have a set of petitions regarding EV, local content, wind towers, recycling...take them out and get them filled.
- **Support Our Actions** - Join our regular demonstrations against imported parts and supplies and help us win the return of Australian manufacturing.
- **Elections** - Join us to work in the federal election campaign to sit the current government on their backside. It's time for a change.
